

Cummins QSB 6.7 Marine Engine Zinc Anodes

The Cummins QSB 6.7 Marine Engine has an anode configuration different than other QSB engines. According to our customers, this new engine model requires the following zinc anodes:

ANODE LOCATION	QUANTITY	ZINC ANODE MODEL	WRENCH SIZE	ZINC ROD DIAMETER	ZINC ROD LENGTH
Heat Exchanger	2	E-1	11/16"	1/2"	2"
After Cooler	2	E-2	7/8"	5/8"	2"
Transmission Cooler	1	E-1	11/16"	1/2"	2"

These anodes can be purchased separately at: <http://www.boatzincs.com/engine-sizes.html>
